

Step 1: right-click the SAS execution file in the directory holding SAS files to create a shortcut on desktop

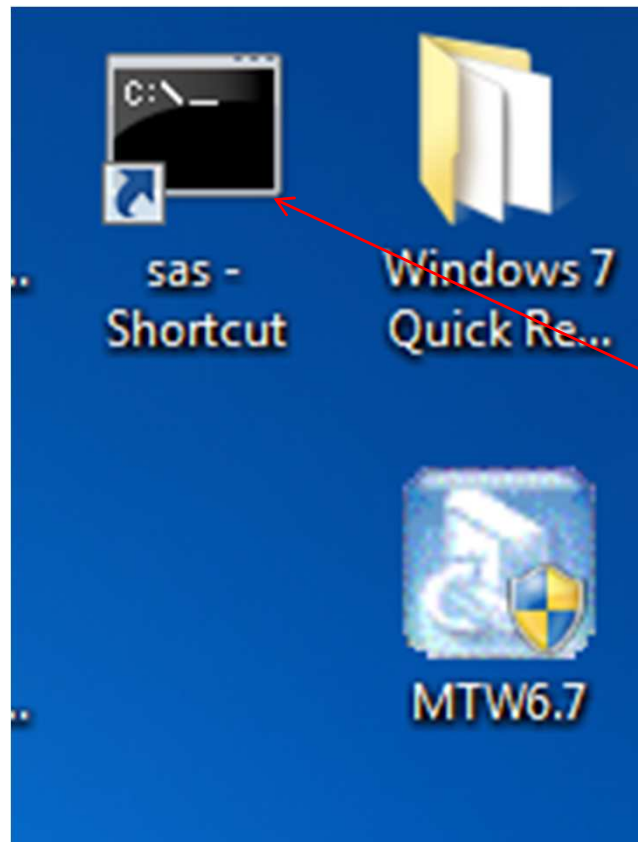

Step 2. right click the shortcut icon of SAS on desktop and choose properties from menu

Step 3: In the properties window, replace
"C:\Program Files\SAS\...\sas.exe" in target field with the following:
cmd.exe /c ""C:\Program Files\SAS\...\sas.exe" "

Step 4: from desk SAS shortcut, launch a SAS session where the proc_r SAS macro will be working.

Result:

double click the shortcut first open a MS-DOS window and then SAS 9.2 interactive mode ensues.
